2 Abstract

Abstract

In a valiant effort to stop my Topology knowledge from dissipating, I have decided to self-study Munkres until my next Analysis course, which will be in about a years time. I know that if I don't keep my math skills sharp, they'll end up as flat as a non-differentiable function. Hopefully this self-study will help me retain my math skills like a homeomorphism preserves topological properties ;)

3 Topological Spaces

4 Basis for a Topology

5 The Order Topology

6 The Product Topology on $X \times Y$

7 The Subspace Topology

8 Closed Sets and Limit Points

9 Continuous Functions

10 The Product Topology

11 The Metric Topology

12 The Quotient Topology

13 Topological Groups
